## Buy an Irrigated Farm

From the Canadian Pacific Railway

Irrigation makes the farmer  
independent of rainfall, and  
insures good crops, not occa-  
sionally, but EVERY YEAR.

Irrigation makes possible the  
successful culture of alfalfa,  
the king of fodder, which in-  
sures good returns in dairying  
and mixed farming.

Irrigation means intensive farm-  
ing and close settlements, with  
all the advantages of a densely  
populated agricultural community.

Irrigation in the Canadian Pacific  
Railway Irrigation Block is no  
longer an experiment, the years  
that it has been put out having  
absolutely demonstrated its success  
wherever intelligently applied.

This is the most liberal offer of irrigated farm land on record.

## Some Reasons Why You Should Buy COAL Now

Primitive Man's first step towards the conquest of the world was taken when he taught himself to be provident.

The most progressive men today, and the most thrifty women are those who look ahead and prepare for the future.

This applies to the question of coal supply, as well as in every other factor that enters into a human's existence. The wise man sees that he has an ample supply of coal stored away long before the cold blasts whistle around the roof.

The careless and thoughtless wait until the last minute and then hurry frantically for fuel that should have been secured weeks ago.

Doesn't this impress you, Mr Reader, as a reasonable argument for getting your coal NOW.

The weather has been fine up to the present but it is hard

to tell when a change may take place.

The coal supply is ample now and can be procured at your leisure. Prices are lower than they will be this winter. Whatever drops, it will not be coal, for the agreement with the miners runs until next spring.

The coal merchants on this page are at your service with a supply of excellent, clean burning coal.

The coal they sell, as those who have used it can testify, is not half ash and clay, but fine, big clean burning lumps.

Bassano people should be careful to secure a supply of coal early this year. In the past they have had the Indian mine, well and skilfully worked to provide their wants.

This year they will be in a "pickle" if the coal bin has been neglected.

## ROSEDALE COAL

The Finest Coal Turned out of Drumheller Valley

Read the Rosedale Policy as told by Mine Manager:

"Rosedale Mine is mining only 4 1/2 feet of coal, which is all Coal and contains no impurities.

Prior to this spring, we mined a nine foot seam, which contained a belt of clay and bone in the middle. Realising that it was necessary to get out an absolutely clean product, the Rosedale Mine abandoned the lower portion of the seam, and, as stated above, is mining only 4 1/2 feet of nice shiny coal. The mining is now done by electric cutters, so that the lump coal is nice and chunky. With regard to the preparation and screening equipment at the Rosedale Mine, it is second to none in the province. All the coal is screened over a 66 ft. Marcus Shaker screen; the lump coal containing all coal passing over a 3" hole; the stove coal containing all coal passing over a 1 1/2" hole and through a 3" hole. This preparation makes our stove coal very uniform in size and it is much in demand for use in kitchen stoves; indeed a great number of consumers are now using stove coal in their furnaces."
